

Turning Healthcare Priorities Into Programs That Work.

The funding is awarded and the deliverables are due. JNI Consulting, LLC helps agencies and funded health initiatives get designed, staffed, launched, and measured. We work across public health, rural health, workforce, and education programs. Every engagement is led by a nurse executive, with vetted partner expertise added to fit scope.

WHERE JNI HELPS

- A grant, state award, or federal allocation must become an operating program.
- Rural and safety-net providers need workforce and technology capacity to use new funding.
- A program is behind on milestones, reporting, or adoption and needs recovery.
- An initiative needs training, curriculum, technical assistance, or an evaluation plan.

CORE CAPABILITIES

Program Design. New programs designed and built from concept to launch: the model, partners, operations, technology, and the measures funders need to see.

Workforce and Education. Workforce assessment, competencies, career pathways, training, and curriculum. JNI's copyrighted healthcare career mentorship workshops are available for licensing to school districts, colleges, and community programs.

Implementation. PMP-certified program and project management, stakeholder coordination, change management, and program recovery.

Innovation. Telehealth, EHR, digital health, and technology and AI readiness assessments.

OUR METHOD: CIX™, POWERED BY READIVANCE™

Understand. Assess. Design. Implement. Improve.

Built from more than 20 EHR go-lives and years of designing programs for hospitals, schools, and communities. You get a clear starting point, a plan your staff can carry out, and measures that show funders what changed.

FOUNDER AND FIRM EXPERIENCE

- Multi-site system administrator for a large municipal health department's electronic vital events registration pilot.
- EHR strategy for rural and critical access hospitals nationwide, including clinical decision support and telehealth design. Presenter to a statewide critical access hospital network.
- Through JNI: Vice President, Clinical Informatics and Strategy, for a national health IT consulting firm (current, under subcontract).
- 20+ EHR implementations for health systems of up to 23 hospitals and 2,200+ beds, delivered directly and as a subcontractor.
- Industry subject matter expert, Career and Technical Education advisory board, Georgia public school district.
- Curriculum designer for YOUTH-MED®, the multipathway healthcare career model of Help for Healthcare Professionals (HHCP), a Georgia 501(c)(3). 71 program completers across three cohorts.

DIFFERENTIATORS

- Clinician-led. Frontline reality is built into every plan.
- Rural, urban, academic, public, and community sector experience.
- Vendor-neutral. No software or staffing to sell. PMP and CPHIMS certified leadership.
